Gunars Lazdans

Profile

Enthusiastic guy with 8 years of experience in the IT industry. I started my IT carrier by working in the Quality Assurance specialty for 6 years, it all began with manual testing, but soon after that I started to get more and more exposure to test automation and by that, I started to increase my technical skills. Later down the line I was able to transition to a software development position and worked as a Frontend Engineer for 2 years.

During my career I have gained a lot of experience working in agile/scrum methodology on projects with complex architecture and millions of users, working closely with my team to deliver value to the production environment as soon as possible.

Education, certification and courses

- **Udemy Course Certificate: Angular - The Complete Guide (2022 Edition)**
- **Course: Java 1 – Introduction to Java. (2017) JavaGuru.lv**
- **ISTQB® Certified Tester Foundation Level certification (2016)**
- **Riga Technical university (2008 – 2012)**
